

Platinex Ring of Fire Involvement

One of the main features of exploration news in the world in the last few years is the discovery of several types of mineral deposits in the James Bay lowlands area known as the “Ring of Fire”. World significant chromium deposits have been found as well as gold, diamonds, nickel-copper-PGE and copper-zinc deposits.

Platinex acquired two very large well situated properties in the Ring of Fire and has recently protected its [claims from aging](#).

Platinex wishes to unleash its initial exploration programs on these properties this winter.

Regards,

James R. Trusler, P.Eng
