

Platinex Supports Go Green Ontario Initiative

TORONTO, ONTARIO, July 18, 2008 - Platinex Inc. (TSX.V:PTX) today announced its support for the Ontario Government initiative to create a protected area in the boreal forest north of 51° latitude and provide local First Nations with more capacity to participate in exploration and development of the non-protected portion of the area, as part of *Go Green Ontario* (www.gogreenontario.ca).

James R Trusler, President and CEO of Platinex Inc. stated, "Platinex holds some 57,400 acres in the McFaulds Lake-Big Trout Lake Belt which is starting to look like a huge nickel, chromium, platinum group element bearing structure. We are one of the larger land holders in the area and providing an environment to allow parties to partner cooperatively is something that Platinex has advocated for a long time. This announcement appears to promise the first step."

About Platinex Inc.

Platinex is a Canadian exploration company based near Toronto. Platinex focuses on carefully selected Platinum Group Element targets in settings analogous to the JM reef (Stillwater Complex, Montana) and the Merensky and UG2 reefs (Bushveld Complex, RSA). Platinex is determined to find platinum sources to be used in the campaign to eliminate the threat of global warming. Shares of Platinex are listed for trading on the TSX Venture Exchange under the symbol PTX.
